

The Department of Public Works invites all residents of the Town of Goffstown to a community forum to discuss the community's needs relating to public works and infrastructure and how the DPW can meet them. Staff will be available to answer questions and listen to any suggestions or public comments. There will be two different evening forums to choose from.

Tuesday, September 18th at 7 PM at High School Media Center

or

Wednesday, September 26th at 7 PM at Bartlett School

The DPW is responsible for roads and drainage, solid waste/recycling collection and disposal, cemetery maintenance, fleet maintenance and sewer maintenance. The DPW would like to invite input from the community on any of our current programs, any services that members of the community think we should pursue; changes that should be considered or perhaps you would like to share positive feedback as well.
